SUBJECT INDEX TO VOLUME 21

A

Adipose tissue, 795
Aged, women, 931
Alanine aminotransferase, 869
Anemia, Iron deficiency, 405
Aniline hydroxylase, 425
Amino acids(s), (see also specific amino acid)
  composition, 25
  content, 887
  deficiency, 231
  intake, excess, 577
  profile, 901
  requirements, 231
  supplementation, 279, 425, 587, 709
  transport, 397
6-Aminonicotinamide, 557
Anthropometric measurement,
  adults, 537
  children, 123. 219
  infants, 93
  preschool children, 447
  pregnant women, 87
Antinutrional, 761

B

Barley, 199, 487
Bioavailability, 135
Biotin, 207
  deficiency, 659
  supplementation, 727
Birth, human,
  defects, 653
  weight, 615
Biscuit, 855
Blood pressure, 39
Body,
  composition, 479
  fat, 745
Brain,
  development, 301
  lipids, 77
  nuclei, 147, 557
Brazil, diets of urban migrants, 11
Breads, North India, 251
Broiler, 887
Buffalo gourd, 837

C

Cadmium,
  absorption, 135
  injestion, 361
  retention, 351
Calcium, 673
  dietary, 127
  metabolism in humans, 429
  needs inman, 11
Caloric restriction, 47, 479
Capsaicin, 455
Carbohydrate, dietary, 569, 781, 795, 807
  disaccharide effect, 113
Carcass, composition, 659
Cassava, 709, 819
Casein, 497, 893, 901
Cellulose, 513
Chickens, 837
Children,
  growth rates, 447
  malnourished, 63
  nutritional status, 123
Cholesterogenesis, 269
Cholesterol,
  biosynthesis, 107
  brain, 77
  dietary, 513
Circadian rhythm, 101
Cockerels, 497
Collagen, 243, 893
Colombia, malnourished children, 63
Conjunctival color test, 405
Cooking, effect on chemical assays, 761
Copper, 341

Corn, 923
Creatine phosphokinase, 387

D

Dairy, products, 673
Dates, 631
Detoxification, Buffalo gourd, 837
Diabetics, 631
Diet,
  alternating, carbohydrate and fat, 437
  efficiency, 11
  fat-free, 689
  high carbohydrate, 781, 795, 807
Dietary,
  fiber, 313
  value, cassava, 819
Digestibility, 285, 721
  fish meal, 887
Digestion, 313, 681, 849

E

Eggs, dietary, 77
Electrophoresis, 199
Elements, trace, 341
Endogenous-nitrogen, 721
Endosulphan, 425
Energy,
  expenditure, 183
  metabolism, 755
  utilization, 55, 157
Enzyme(s), (see also specific enzyme)
  aniline hydroxylase, 425
  creatine phosphokinase, 387
  fatty acid synthetase, 861
  glucose-6-phosphate dehydrogenase, 861
  glutamic oxaloacetic transaminase, 387
  _____ pyruvic transaminase, 387
  lactic dehydrogenase, 387
  HMC-CoA reductase, 107
  lipase, 795, 807
  renal, 889
  ribonuclease, 413
Ethanol, 397, 739
Ewe, 525
Exercise, 907

F

Fat, 327
  dietary, 569
  _____ level, 659, 879
  subcutaneous deposition, 87
Fatty,
  acid, synergism, 755
  ____, synthetase, 861
  liver, 77, 689
Feed,
  efficiency, 55
  rabbit, 587
Fetal metabolism, sheep, 525
Fiber, 681, 861
  level and particle size, 313
Fish,
  meal, 887
  waste, 901
Flavor, nursing pig, 519
Fluoride, metal, in humans, 429
Folate, content in bread, 251
Food,
  acceptability,
    flavor and test perception, 913
  distribution and intake, Philippines, 375
  efficiency, 745
  intake, 101, 595
  supplementation, preschool children, 447
Fructose, dietary, 605
Fruit pomace, 55

G

Gastric, transport, 739
Globulin, fractions, 537
Glycogenesis, 879, 889

Glucose, 113, 631, 689
dietary, 605
serum levels, 437
utilization, 569
Glucose-6-phosphatase, 869
_____phosphate dehydrogenase, 861
Glutamic oxaloacetic transaminase, 387
_____ pyruvic transaminase, 387
Glycerol, 689
Growth,
children, 219
compensation, 479
in pigs, 519
neonatal forebrain, rats, 171
organ, in rats, 595
Guatemalan, growth in children, 219

H

Hair, 341, 413
Heart, 807
Hens, laying, 855
Hepatic cholesterogenesis, 107
Hepatocytes, 269
Honey, 631
Hormones, medroxyprogesterone acetate, 47
3-Hydroxy-3-methylglutaryl coenzyme A reductase, 107
Hypertension, 39
Hypertriglyceridemia, 781, 795, 807
Hypothyroidism, 497

I

Immunocompetence, 931
Infants,
birth weight, 341
formulations, 727
nutritional status, 93
Insulin, serum levels, 437, 631
Intestinal perfusion, 397
Intestine, phosphoinositide metabolism, 551
Iodine, 341
Iron,
deficiency, 405
dietary, 127

K

Kidney, lesions, 163
Kwashiorkor, 63

L

Lactation, amino acid deficiency, 231
Lactic dehydrogenase, 387
Lead, retention in rats, 1
Leaf protein, 587
Lettuce, 135, 313, 681
Lignin, 513
Linoleic acid, 39
Lipase, 795, 807
Lipids, 207
bile, 497
blood, 113
liver, 497
loss, 577
metabolism, 77, 513, 781
plasma, 497
synthesis, 605
Lipogenesis, 269, 861
Lipogenic enzyme activity, 879
Lipoprotein, 795, 807
Liver, 781
lipids, 425
Lysine, 901
deficiency 231
supplementation, 425, 587, 625

M

Malnutrition, infants, 93
Manganese, 341
Markers, dietary, 323
Maternal,
dietary intake in humans, 615
malnutrition in sheep, 525

Mathematical model, 189, 595
Medroxyprogesterone acetate, 47
Men, European and African, 183
Mental retardation, 469
Metabolic nitrogen, 721
Metals, heavy in vegetables, 733
Methionine, 901
  deficiency, 231
  intake, 577
  supplementation, 709
Microscopy, scanning electron, 681, 849
Milk, human, 727
Millet, 625
Mineral(s), (see also specific mineral)
  dietary, 1
  tissue, 127
Monosaccharides, 913
Morbidity, in children, 63

N

Neuron, 171, 301
Nigeria, women, 87
Nitrogen,
  balance, 455, 721
  retention, 243
  utilization, 257
Nutritional
  assessment, 405
  deficiency during pregnancy, 653
  encephalopathy, 769
  status,
    children, 123, 219
    elderly women, 931
    infants, 93
  supplement, in pregnant women, 615
  value,
    cassava, 819
    fish meal, 887

O

Organ,
  development, in rats, 699
  weights, 189
Overweight, 469
Oxides, rare earth, 323

P

Pancreatin, 285
Pathology, vitamin E deficiency in rats, 387
Philippines, urban food and nutrient distribution, 375
Phosphoenolpyruvate carboxykinase, 869
Phosphoinositides, 551
Phytate, 257
Pigs, 323, 519
  growing, 127
Polychlorinated biphenyls, 107
Prealbumin, 123
Pregnancy,
  amino acid deficiency, 231
  multiple in sheep, 525
  nutritional deficiencies in humans, 653
  skinfold thickness in women, 87
Protein,
  content, 901
  dietary levels, 157, 505, 879
  _____ suboptimal, 1
  digestibility, 25
  extraction, 199
  hydrolysates, 893
  intake, 717
  leaf, 587
  malnutrition, 147, 557
  nutritive value, 837
  quality, 25, 285, 645, 923
  utilization, 709
Protein-calorie malnutrition, 171, 413
_____ supplement, 219
Protein-energy malnutrition, 447
Protein efficiency ratio, 25, 645, 709 923
Pyruvate carboxylase, 869

R

Rabbits, 55
  feed, 587
  growing, 157
Racemisation, 279
Red pepper, 455
Renal failure, in humans, 429
Renutrition in children, 63
Reproduction, in turkeys, 505
Resting activities, energy expenditure, 183
Ribonuclease, 413
Ribonucleic acid, synthesis, 147, 557
Rice diets, 425
Ruminants, 487

S

Saccharin, 329
Scallops, 351, 361
Seafood, diet in rats, 351, 361
Selenium, 829
  absorption, 135
Serum, protein, 717
Sheep, 525
Shrimp, 901
Skinfold thickness, 87
Sludge, amendment to soil, 733
Smoking, 907
Sodium chloride, 39
Solubility, 199
Sorghum, 761
Soy, 497
Starvation, 889
Stomach, 739
Sucrose, 329, 689, 745
  dietary, 861
Swine, 625, 829
  growing, 127

T

Tallow, animal, 755
Tannin, 761
Taurocholate, absorption, 513
Tetrahymena thermophila, 645
Threonine, supplementation, 425
Tocopherol, plasma, 531
Transport,
  bidirectional, 397
  gastric mucosal, 739
Triglycerides, 795, 807
Triticale, 923
D-Tryptophan, utilization, 279
Turkey, 505

U

Undernutrition, neonatal, 551
Underweight, 469
Upper-Volta, children, 123
Urea, blood, 101

V

Vanadium, 341
Vegetables, 733
Vitamin(s), (see also specific vitamin)
  A, 769
    deficiency, 699
  $B_6$, deficiency, 163, 301
  C,
    serum, 537
    status, 907
  E, 769, 829
    absorption in humans, 531
    deficiency, 387

W

Waxy barley, 487
Weight,
  birth, infants, 341, 615
  disorders, in retarded adults, 469
Wheat, 923
  bran, 313, 849
Women, elderly, 717
Wound, healing, 243

Z

Zinc, 341
metabolism, 257

# SUBJECT INDEX TO VOLUME 22

A

Acrylonitrile, 677
Adipose tissue, 135
Adolescents, 915
Adrenal glands, 213
Aging, in ewes, 101
Alkaline phosphatase, 323
Aminopyrine N-demethylase, 395
Amino acid(s), (see also specific amino acid)
availability, 863, 901
content, 497
dietary levels, 563
excess, 751
excretion, 863, 901
free, 883
incorporation, 545
levels, 453
_____, in humans, 431, 697
metabolism, 597
plasma, 173, 539
profiles, 101
requirements, 167, 409
synthetic polymer, 070
supplementation, 109, 313, 369, 811
Ammonia, 101
Anthropometric measurements, 915
Antioxidant status, 873
Arginase, 167
Arsenic, toxicity, 123
Ascorbate distribution, 741
Ascorbic acid, 555
Assay, short term, energy, 117, 589
Atherosclerosis, 295
ATP citrate lyase, 245

B

Baboons, 223
Banana peel, sugar, 207
Barley, 833
Beans, 607
greenfield, 965
Beef, quality, 973
Behavioral patterns, rabbits, 647
Benzpyrene hydroxylase, 395
Bile acids, 513, 521
Bleeding, 1
Blood pressure, 759
Body composition, 213, 751
Bone, mineralization, 483
Brain, ascorbic acid, 741
Bread, quality, 469
Broiler, diets, 343
Buffalo gourd, 445

C

Calcium,
availability, 271
bioavailability, 469
status, 483, 625
Calorie, restricted rats, 729
Calves, growth, 811
Carbohydrate, 79
metabolism, 597
Carbodox, 949
Carcinogenesis, 395, 891
Casein, 69, 187
Cassava, 343
Cereal, 109
breakfast, 389
diet supplement, 223
fortification, 469
Children, preschool diet, 839
Cholesterol,
7-α hydroxylase, 339, 641
level, 965
_____, in women, 285
metabolism, 91, 339, 641, 687
plasma, 513
Choline, 369
Chromium, content in hair and urine, 49

Cigarettes, 301
Circadian rhythms, 729
Cockerels, 183, 745, 883, 901
Copper, 389, 939
  balance, 459
  deficiency, 295, 617
Corn, 657, 667
  ...starch, 419
Cysteine, dietary, 123

D

Diet,
  modified, 395
  Nigerian, 497
  preschool children, 839
Dietary,
  fat, 279
  oils, 687
  recall, in infants, 571
  zinc/copper ratios, 285
Diesthylstilbestrol, 483, 625
Digestion, in vitro, 771
Disease, ischemic heart, 295, 617
DNA-dependent RNA polymerase III, 17
Dry matter, metabolizability, 901

E

Egg, 263
Electrical stimulation, 973
Electrophoresis, 17
Elements, trace, 295, 723
Endogenous urinary energy, 183
Energy,
  metabolizable, 79, 117, 147, 361, 503, 589, 745
  requirements, 751
Enzyme(s), (see also specific enzyme)
  DNA, 17
  glutamicoxaloacetic transaminase, 9
  glutamicpyruvic transaminase, 9
  hepatic, 395
  _____ amino acid-catabolizing, 883
  inhibition, 771
  immobilized, 187, 193
  lipogenic, 245
  lysosomal, 223
  peroxidase, 873
  renal, 597
  RNA, 17
  supplementation, 833
  trypsin, 187, 193
Erucic acid, 503
Ethanol, 57, 453
Ewes, 101
Excreta, collection period, 589
Excretion,
  amino acids, 901
  metabolic and endogenous energy, 147

F

Fat, 79
  dietary, 279
  saturation 759
Fatty,
  acids, 925
  liver, 9
Fecal losses, 353
Feed,
  consumption, 907
  intake, 745
  passage rate in rooster, 361
Female, psychogeriatric patients, 49
Fertility, roosters, 41
Fiber,
  dietary, 353, 459, 863
  effect in cockerels, 183
Fluroide, 957
Food,
  condiments, 497
  intake, 409, 563, 751
  _____, in Macaques, 477
  patterns, 915
  water content, 869
Fumigation, 677
Fructose feeding, 801

G

Garlic oil, 641
Genetic engineering, 707
Genital, maturation in rats, 823
Gerbils, 409
Glucose, utilization, 419
Glutamate,
  intake in humans, 431
  serum levels, 697
Glutamicoxaloacetic transaminase, 9
Glutamicpyruvic transaminase, 9
Gluten, wheat, 313
Growth,
  broiler breeder, 383
  carcinosarcoma-bearing rats, 563
  chicks, 545
  rats, 57
  performance, monkeys, 935
Guinea pig, 555

H

Habituation, in quail, 253
Hair, chromium content, 49
Heart, ischemic, 295, 617
Honey, 319
Hormone, thyroid, 135
Human,
  development, 697
  nutrition, 29
Hydroxyproline, 625
Hypercholesterolemia, 513, 617
Hyperlipoproteinemia, 295
Hypertension, 759
Hyperuricemia, 617

I

Immune response, 313
Infants,
  nutrient intake, 571
  serum amino acid levels, 431
Insulin, 199
Iron,
  balances, 459
  ionisable content, sorghum 723

L

Lactoperoxidase, 793
Leucine, 545
Lipids, 279
  plasma, 521
Lipoprotein lipase, 157
_____s, 521
Liver,
  lipids, 801
  nucleic acids, 729
  protein, turnover rate, 69
  rat, 17
Lymphocyte, transformation, 279
l-Lysine, 707
  supplementation, 109, 313, 811

M

Magnesium, 957
Malnutrition, baboons, 223
Manganese, 939
Maturation, genital, in rats, 823
Metabolic fecal energy, 183
Metabolizable energy, 79, 117, 147, 183, 253, 361, 745
Methionine,
  excess, 751
  supplementation, 9, 109, 369, 811
Method, measurement of water in food, 869
Mexican, diet, 839
Milk, human, 793
Millet, porridge, 109
Mineral(s), (see also specific mineral)
  content, effect of pearling, 723
  losses, 353
  trace, 459
  utilization in humans, 529
Monkey,
  pig-tailed, 353

Japanese, macaques, 477, 935
Muscle, skeletal, 453
Muscular dystrophy, 853
Myeloperoxidase, 323

N

Neonate, 939
Nephrocalcinosis, 957
Net protein utilization, 607
Neural, electrolytes, 647
Neutrophils, rat, 323
Niacin, 329
Nitrogen,
  excretion, 863
  utilization, 811
Nuclear, 3-mile plant, 319
Nucleic acids, 631, 729
Nutrition, human, 503; 529
Nutritional,
  assessment, 839
  composition, grain maturity, 657
  quality, grain maturity, 667
  status, female psychogeriatric, 49
  _____, infants, 571

O

Oxidation, ascorbate, 555

P

Pantothenic acid, 329
Pearling, 723
Pectin, 91, 459
Phaseolus, 607
Phytate, free and enriched diets, 891
Pigs, 925
  artificially reared, 419
Platelets, 1
Poly-1-lysine, 707
Porcine, proteinases, 771
Pregnancy, in rats, 1, 781
Protein, 91
  concentrate, 491
  content, 497
  dietary, 69, 263, 539
  digestibility, 193
  malnutrition, 135
  nutritional value, 329
  quality, 29, 235, 581, 907
  restricted diets, 781
  requirements, 167
  single-cell, 631
  starvation, 17
  turnover, 235
  utilization, 581, 949
Protein-energy malnutrition, 157
Protein efficiency ratio, 271, 607, 907, 973
Proteolysis, 771
Pullet, development, 383

Q

Quail, 253

R

Rabbits, 647, 853
Radioactivity, 319
Ragi, nutritional quality, 271
Rapesee, 491
  oil, 503
Ratios, 285
Refeeding, 213, 245
Reproduction, rats, 781
Roosters, 41, 147, 361
Root-meal, 343

S

Salt, deficient diet, 383
Saponins, 513, 521
Sarcoplasmic reticulum, 853
Serum, GOT and GPT, 9
Smoking, 301
Sorghum, 657, 667
  effect of pearling, 723
  waxy and nonwaxy, 529

Soyabean, 109
Starter rations, calves, 811
Starvation, 173
Starvation-refeeding, 213, 245
Stomach, contents, 199
Strain differences, rats, 801
Sucrose, 199
  utilization, 419
Sugar, banana peel, 207
Sulfur, 369
Survival, in rats on ethanol diet, 57
Swine, 833, 949

T

Temperature, effect on feed consumption, 907
Tenebrio molitor, 491
Threonine,
  deficiency, 9
  supplementation, 313
Thyroid hormones, 135
Toxicity, 445
Trace elements, 295, 723
Trans isomer, 925
Transit time, 965
Triglyceride, serum, 801
Trout, 631
Trypsin, 187, 193
Tryptophan, 173, 563
Tumors, 563
Turkeys, 263

U

Urea, 101
Uric acid, levels in turkeys, 263
Urine, chromium content, 49

V

Valine, 545
Vitamin(s), (see also specific vitamin)
  A, deficiency, 647
  C, 301
    in brain, 741
  E, 41, 301, 823
    deficiency, 853, 873
    supplementation, 339
    utilization in humans, 529

W

Water,
  intake in macaques, 477
  measurement in food, 869
Weight, in monkeys, 935
Wheat, 539
Wound healing, 167

X

Xylitol, preoral administration, 793

Z

Zinc, 389
  balances, 459
  deficiency, 1, 323, 891
  dietary, 491
  supplementation, 581
Zinc/copper, dietary rations in women, 285
